SARA DE PASQUALE

Sara (b. 1974) is a Zurich-based interdisciplinary visual artist and creative director in the financial sector. Her work reveals what we often don't see in depth and engages with the concept of decontextualization. The images are ambiguous, violent, and above all, mindful. The wounds of nature break open and truth seeks its way to the light. They are alive and do not stand still. The days change their color and light and the structure moves and dissolves again.
